LITERATURE / LITERATURVERZEICHNIS

GENERAL NEUROLOGY / NEUROLOGIE

Marconi B., Filippi G.M., Koch G., Giacobbe V., Pecchioli C., Versace V., Camerota F., Saraceni V.M. & Caltagirone C. (2011). Long-term effects on cortical excitability and motor recovery induced by repeated muscle vibration in chronic stroke patients. **Neurorehabilitation and Neural Repair**. 25(1):48-60.

Murillo N., Valls-Sole J., Vidal J., Opisso E., Medina J. & Kumru H. (2014). Focal vibration in neurorehabilitation. **European Journal of Physical and Rehabilitation Medicine**. 50:231-42.

Tavernese E., Paoloni M., Mangone M., Mandic V., Sale P., Franceschini M. & Santilli V. (2013). Segmental muscle vibration improves reaching movement in patients with chronic stroke. **A randomized controlled trial. NeuroRehabilitation**. 32(3):591-9.

SPASTICITY / SPASTIK

Caliandro P., Celletti C., Padua L., Minciotti I., Russo G., Granata G., La Torre G., Granieri E. & Camerota F. (2012). Focal muscle vibration in the treatment of upper limb spasticity: a pilot randomized controlled trial in patients with chronic stroke. **Archives of Physical Medicine and Rehabilitation**. 93(9):1656-61.

Casale R., Damiani C., Maestri R., Fundaro C., Chimento P. & Foti C. (2014). Localized 100 Hz vibration improves function and reduces upper limb spasticity: a double-blind controlled study. **European Journal of Physical and Rehabilitation Medicine**. 50:495-504.

Hagbarth K.E. & Eklund G. (1968) The effects of muscle vibration in spasticity, rigidity, and cerebellar disorders. **Journal of Neurology, Neurosurgery & Psychiatry**. 31(3):207-13.

Liepert J. & Binder C. (2010). Vibration-induced effects in stroke patients with spastic hemiparesis--a pilot study. **Restorative Neurology and Neuroscience**. 28(6):729-35.

Lin H.N., Nagaoka M., Hayashi Y. & Hatori K. (2012). Effect of vibration stimulation on dysbasia of spastic paraplegia in neuromyelitis optica: a possible example of neuronal plasticity. **BMJ Case Reports**. 10.1136/bcr-2012-006793.

Murillo N., Kumru H., Vidal-Samsó J., Benito J., Medina J., Navarro X. & Valls-Sole J. (2010). Decrease of spasticity with muscle vibration in patients with spinal cord injury. **Clinical Neurophysiology**. 122(6):1183-9.

Murillo N., Valls-Sole J., Vidal J., Opisso E., Medina J. & Kumru H. (2014). Focal vibration in neurorehabilitation. **European Journal of Physical and Rehabilitation Medicine**. 50:231-42.

Noma T., Matsumoto S., Shimodozono M., Etoh S. & Kawahira K. (2012). Anti-spastic effects of the direct application of vibratory stimuli to the spastic muscles of hemiplegic limbs in post-stroke patients: a proof-of-principles study. **Journal of Rehabilitation Medicine**. 44:325-330.

Paolini M., Giovannelli M., Mangone M., Leonardi L., Tavernese E., Pangrazio di E., Bernetti A., Santilli V. & Pozilli C. (2013). Does giving segmental muscle vibration alter the response to botulinum toxin injections in the treatment of spasticity in people with multiple sclerosis? A single-blind randomized controlled trial. **Clinical Rehabilitation**. 27(9):803-812.

Paoloni M., Mangone M., Scettri P., Procaccianti R., Cometa A. & Santilli V. (2010). Segmental muscle vibration improves walking in chronic stroke patients with foot drop: a randomized controlled trial. **Neurorehabilitation and Neural Repair**. 24(3):254-62.

CEREBRAL PALSY / INFANTILE ZEREBRALPARESE

Celletti C. & Camerota F. (2011). Preliminary evidence of focal muscle vibration effects on spasticity due to cerebral palsy in a small sample of Italian children. **Clinical Therapeutics**. 162(5):125-128.

Eklund G. & Steen M. (1969). Muscle vibration therapy in children with cerebral palsy. **Scandinavian Journal of Rehabilitation Medicine**. 1(1):35-37.

Katusic A., Alimovic S. & Mejaski-Bosnjak V. (2013). The effect of vibration therapy on spasticity and motor function in children with cerebral palsy: a randomized controlled trial. **NeuroRehabilitation**. 32(1):1-8.

NEGLECT / NEGLECT

Johannsen L., Ackermann H. & Karnath H.O. (2003). Lasting amelioration of spatial neglect by treatment with neck muscle vibration even without concurrent training. **Journal of Rehabilitation Medicine**. 35(6):249-53.

Kamada K., Shimodozono M., Hamada H. & Kawahira K. (2011). Effects of 5 minutes of neck-muscle vibration immediately before occupational therapy on unilateral spatial neglect. **Disability and Rehabilitation**. 33(23-24):2322-2328.

Karnath H.O., Christ K., Hartje W. (1993). Decrease of contralateral neglect by neck muscle vibration and spatial orientation of trunk midline. **Brain**. 116:383-96.

Karnath H.O, Reich E., Rorden C., et al. (2002). The perception of body orientation after neck-proprioceptive stimulation: effects of time and of visual cueing. **Experimental Brain Research**. 143:350-8.

Murillo N., Valls-Sole J., Vidal J., Opisso E., Medina J. & Kumru H. (2014). Focal vibration in neurorehabilitation. **European Journal of Physical and Rehabilitation Medicine**. 50:231-42.

Schindler I., Kerkhoff G., Karnath H.O., Keller I. & Goldenberg G. (2002). Neck muscle vibration induces lasting recovery in spatial neglect. **Journal of Neurology, Neurosurgery and Psychiatry**. 73(4):412-9.

PARKINSON'S DISEASE / MORBUS PARKINSON

Jöbges E.M., Elek J., Rollnik J.D., Dengler R. & Wolf W. (2002). Vibratory proprioceptive stimulation affects Parkinsonian tremor. **Parkinsonism & Related Disorders**. 8:171-176.

King L., Almeida Q.J. & Ahonen H. (2009). Short-term effects of vibration therapy on motor impairments in Parkinson's disease. **NeuroRehabilitation**. 25:297-306.

Valkovic P., Krafczyk S., Saling M., Benetin J. & Bötzel K. (2006). Postural reactions to neck vibration in Parkinson's disease. **Movement Disorders**. 21(1):59-65.

SWALLOWING / SCHLUCKSTÖRUNG

Gow D., Hobson A.R., Furlong P. & Hamdy, S. (2004). Characterising the central mechanisms of sensory modulation in human swallowing motor cortex. **Clinical Neurophysiology**. 115: 2382-2390.

Lowell S. Y., Poletto C. J., Knorr-Chung B. R., Reynolds R. C., Simonyan K., & Ludlow C. L. (2008). Sensory stimulation activates both motor and sensory components of the swallowing system. **Neuroimage**. 42(1), 285-295.

de Lama Lazzara G., Cathy Lazarus C., Logemann J. A. (1986). Impact of thermal stimulation on the triggering of the swallowing reflex. **Dysphagia**. 1(2): 73-77.

Steele C. M. & Miller A. J. (2010). Sensory Input Pathways and Mechanisms in Swallowing: A Review. **Dysphagia**. 25(4): 323–333.

PAIN / SCHMERZ

Guieu R., Tardy-Gervet M.F. & Giraud P. (1993). Substance P-like immunoreactivity and analgesic effects of vibratory stimulation on patients suffering from chronic pain. **Canadian Journal of Neurological Sciences**. 20(2):138-41.

Lundeberg T., Nordemar R. & Ottoson D. (1984a). **Pain alleviation by vibratory stimulation**. *Pain*. 20(1):25-44.

Lundeberg T. (1984b). Long-term results of vibratory stimulation as a pain relieving measure for chronic pain. **Pain**. 20(1):13-23.

Lundeberg T. (1984c). The pain suppressive effect of vibratory stimulation and transcutaneous electrical nerve stimulation (TENS) as compared to aspirin. **Brain Research**. 294(2):201-9.

Lundeberg T. (1985b). Relief of pain from a phantom limb by peripheral stimulation. **Journal of Neurology**. 232(2):79-82.

Lundeberg T., Ekblom A. & Hansson P. (1985c). Relief of sinus pain by vibratory stimulation. **Ear Nose & Throat Journal**. 64(4):163-7.
